New CSC Training Facility Initiated by First Class...

Participants in Test and Troubleshooting I, a class taught by Technical Training Specialists Mel Anderson and Leroy Franklin, recently "broke the ribbon" on the new CSC training facility, located in the CSC building.

Moved from Holiday Inn to be under one roof with related services, the new facility houses technical training for mobile, station, personal and power line carrier products. Service people come from all over the world to learn how to best install and maintain their GE communication equipment.

Kenny Guthrie, manager of product information and technical training, notes that the facility set-up emphasizes a

Instructor MEL ANDERSON uses blackboard to emphasize a point.

"hands on" approach. "The students learn more by actually working with the equipment

during these sessions than just by hearing about it."

The roster for this first session, while including some of our own people, represented widely-diversified customers and locations. Attendees came from the Canadian Pacific Railway, the U.S. Forest Service, Shell Oil, Utah Transit Authority, State of Tennessee Transportation Department, the Jordanian Government, and more.

A couple of "our" people update their expertise at a training session. MAC BRUINGTON (left) from Richmond sits up front beside JIM YATES, who works with FMR equipment here in Lynchburg.

While in Lynchburg attending the training session (see story, page 1), two class members, Mohamad Faleh Omari and Khalaf Abdul Jalil, from the Kingdom of Jordan, had news of the death of their queen and others of their countrymen. On behalf of Lynchburg GE, Technical Training Manager Kenny Guthrie wrote the letter printed at right.

Technical Trainer CHARLIE WILL recently marked his 15th GE anniversary. Manager KENNY GUTHRIE was on hand to offer congratulations and present the service award.

Information please

Q: Why don't you get a copy of your appraisal? Anything you sign you should get a copy of.

A: Employees may obtain a copy of their appraisal by requesting a copy from their foreman at the time of appraisal.

Incidentally, your signature on the appraisal is only necessary to indicate that you have seen and read the appraisal. Your signature on the appraisal form does not indicate your agreement or disagreement with comments in the appraisal.

The News extends sympathy to the family of Kitty and Joe Scoville in the death of her sister, Mrs. Austin Quick, last week. The Scovilles are presently employed with GE in Florence, having transferred there from Lynchburg GE.

THE EMPLOYMENT OFFICE REPORTS THE FOLLOWING OPEN POSITION: LH-29, Crystal Mfg. Tech., C. Gray, 1st shift, MVR; Special Requirements: Working experience in all phases of Crystal Mfg. required. Expected to train in quartz cutting, calculator and computer operation, and data analysis, and operation of lab automatic test equipment. All eligible to apply. Forms should be in by Friday, March 4, 1977.

Messrs. Mohamad Faleh Omari
Khalaf Abdul Jalil

Gentlemen:

We learned only this morning of the tragic death of your beloved Queen Alia and others of your countrymen.

The closeness between both governments and peoples of the Kingdom of Jordan and the United States of America make us share your great sense of loss. Within General Electric at Lynchburg, the pleasant business relationships with your country, along with our personal admiration for your Royal Family, make us even more concerned.

Since you are with us now as guests of the people of the United States and of General Electric, please accept our sincere condolences. And, we ask that you extend them on our behalf to your associates in government, to your families and to your nation.

Sincerely,

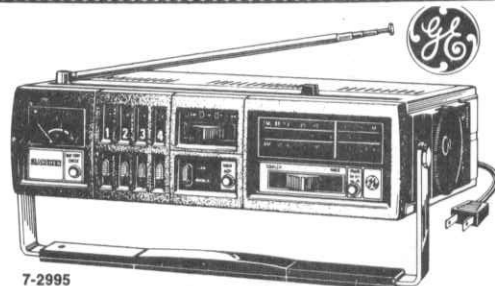

A. K. Guthrie, Manager

Appreciation

Words cannot express my heart-filled appreciation for the love and thoughtfulness shown me and my family during our recent bereavement. May God bless you all.

--Art Messner and family

The News expresses sympathy to the family of MARSHALL EDWARDS whose brother died last Thursday, in North Carolina. The family has asked that those wishing to make a memorial consider the Cancer Society. Marshall is Sales Supervisor of the finished goods warehouse and FMR.

The "SEARCHER" — FM/AM plus PS-VHF (hi) with Tunable Scanning

The latest concept in radio entertainment. A fine quality FM/AM Portable Radio which also scans the full PS-VHF (hi) spectrum. And the scanning function is *tunable*. No separate crystals to buy. All the excitement of Public Service band scanning plus FM and AM radio.

Tuning: • Individual vernier adjustment knobs allow tuning of 4 separate VHF (hi) channels. No crystals required • Separate vernier tuning for FM and AM • Manual/Scan control allows selection of any pre-tuned PS-VHF (hi) channel • By-pass select switches allow automatic scanning of any combination of 2, 3 or 4 pre-selected channels
Features: • Battery check button • Squelch control on PS-VHF (hi) band • Continuous tone control • 4" ceramic magnet speaker • PS-VHF (hi) tuning controls protected by removable cover • Swivel telescopic whip antenna for FM and PS-VHF (hi); built-in ferrite rod for AM • Two-way Power: plays on 6 "D" size batteries (not incl.) or AC house current • IC controlled scanning functions • May be played in vertical or horizontal position • Earphone jack (earphone optional) • Color: Black and Gray
