

CPD NEWS

PUBLISHED BY EMPLOYEE AND COMMUNITY RELATIONS [EXT-710] FOR ALL LYNCHBURG GENERAL ELECTRIC EMPLOYEES

VOLUME 7 NUMBER 8

LYNCHBURG, VIRGINIA

WEDNESDAY JANUARY 13, 1965

FOUR SHARES IN A ROW -- The quartet from Mobile Equipment Engineering lined up for hearty congratulations...and a share of General Electric stock, for special contributions they'd made, in line with a new patent now applied for by CPD. The four -- (left to right) Technician Ken Wright, Technical Specialist Fred Spangler, Engineer Tom McKee and Electronic Design Engineer Dick Myers -- jointly figured in the design of a new concept known as our "search lock monitor" feature, used for the first time in the MASTR Progress Line. The device works in a "flip-flop" fashion, according to a spokesman for the group... "oscillating between two frequencies." When it recognizes a signal, the device locks itself there automatically, assuring an uninterrupted message. -- The Mobile Equipment Engineering men -- who work under Bill Chaney's direction -- conceived this invention and completed the design work about two years ago.

CAR VALUE TAX SHEET AVAILABLE...

Lynchburg General Electric people who want to find the assessed automobile values, prepared by the Commissioner of Revenue, will find the listing now posted at Mountain View Road and Carroll Avenue plants.

THE VALUES ARE NEEDED IN THE PERSONAL PROPERTY TAX REPORTS WHICH ARE FILED WITH THE STATE TAX REPORT...BUT NOT PAID UNTIL NEXT NOVEMBER.

At Mountain View Road, the list has been posted in the Communications Office (Room 1476) near the Main Cafeteria; and also on the bulletin board in the hall between the entrance to Graphic Reproduction and the Telecommunication Laboratory.

At Carroll Avenue, the assessed values are posted in the office of E&CR Administrator Ray Wilhoit; and on the Cafeteria bulletin board.

GE EXPERT ON RAPID TRANSIT SPEAKS

General Electric's approach at helping unclog city streets and increase the efficiency of urban transportation will be highlighted at a meeting of the Lynchburg Society of Engineering and Science next Tuesday.

THE EXPERT IN THE FIELD OF RAPID TRANSIT IS JAMES WALLACE, AN APPLICATION ENGINEER IN PRODUCT PLANNING AND MARKETING RESEARCH FOR THE COMPANY'S LOCOMOTIVE AND CAR EQUIPMENT DEPARTMENT, AT ERIE, PA. JIM HAS WORKED IN THE NEW AND FAST-MOVING METROPOLITAN TRANSPORTATION EQUIPMENT FIELD FOR THE PAST FOUR YEARS, AND IS NOW ASSIGNED BARTD PROJECT COORDINATOR FOR ALL OF GE. CPD IS (See **GE ENGINEER SPEAKS TO LSES**, p.2)

THE VALUE FOR ALL CARS OLDER THAN 1956 IS \$100; AND ON 1965 MODELS, THE VALUE IS A STRAIGHT 60% OF THE SALES PRICE. ALL OTHER MODELS FROM 1956-1964 ARE LISTED.

THE SUBJECT IS TELECOMMUNICATIONS

Four representatives of an important buyer in the telecommunications market -- Page Communication Engineers, Inc., of Washington -- will sit down with CPD management people today. The opportunity: to explain to Page, CPD's capabilities and expanded development of the microwave and multiplex product (and associated) lines.

AS PART OF THEIR ACTIVITY TODAY, THE WELCOME GUESTS WILL TOUR PLANT FACILITIES AFTER A NOON-TIME LUNCHEON. BILL FANNING, MANAGER-SHOP OPERATIONS (REQUISITIONS AND SYSTEMS) WILL CONDUCT THE FACTORY VISIT AT ABOUT 1:30 P.M.

Earlier, the foursome will be welcomed by Department General Manager Dick Gifford, and others in Marketing and Engineering management functions. (See **PAGE ENGINEERS HERE TODAY**, p.2)

GE STOCK closed yesterday at 95-5/8.

MORE REGULAR BOWLERS NEEDED...

Men signed up to regular bowling teams are asked to help recruit additional team members for two groups short of the number they need.

GEERA BOWLING COORDINATOR GEORGE SVITEK SAID TODAY THAT THREE VACANCIES EXIST ON MEN'S TEN-PIN TEAMS AT THE PRESENT TIME. "RECENT HEAVY TRANSFERS HAVE CREATED THIS PROBLEM," HE SAID, "AND YOUR BOWLING BOARD OF DIRECTORS IS APPEALING FOR HELP IN FILLING THE EMPTY SLOTS FOR THE BALANCE OF THE SEASON." "IF YOU ARE NOW A SUBSTITUTE AND CAN BOWL REGULARLY, OR HAVE BEEN IN RETIREMENT AND CAN STILL FLING A BALL, LET US HEAR FROM YOU," SVITEK WENT ON TO SAY. PRIOR EXPERIENCE IS, IN FACT, UNNECESSARY, HE POINTED OUT: RANK BEGINNERS ARE WELCOME AS THE GEERA LEAGUES ARE HANDICAP PLAY.

Openings now exist on the Pinheads team which rolls at 7:00 p.m. Tuesdays at Crestlanes; and also on the MTP team which bowls at 7:00 p.m., Thursdays at Lynchburg Lanes. Earl Ragan, Captain of the Pinheads can be contacted on Ext. 238; and MTP Team Captain Don Chaisson can be reached at Ext. 241.

WITH THE ONSLAUGHT OF WINTER, WOULD-BE BOWLERS CAN TAKE THIS SPECIAL OPPORTUNITY TO GET INTO THE GAME THIS SEASON.

PAGE ENGINEERS HERE TODAY (Cont'd)

Pete Smee, Engineering Consultant - Telecommunication Systems in Marketing, will act as host for the visitors

THE PAGE REPRESENTATIVES INCLUDE SALES MANAGERS GEORGE DANNALS AND MALCOLM MOBLE; EITEL RIZZONI, ASSISTANT DIRECTOR OF TELECOMMUNICATIONS; AND HARRY CALPAKIS, ASSISTANT DIRECTOR OF ENGINEERING.

They will be accompanied at the CPD headquarters operation here by Bob Johnson, Manager-Government Sales for CPD in Washington; and Lloyd Morse, Manager-Major Accounts, also of CPD's Washington Office.

PAGE IS A LARGE CONSULTING ORGANIZATION WHICH IS PRIME CONTRACTOR FOR ENGINEERING SYSTEMS DESIGN AND INSTALLATION WORK. PAGE ENGINEERS HANDLE A MAJOR PORTION OF THE U.S. GOVERNMENT'S TELECOMMUNICATION PROCUREMENT. THEY DO NOT, HOWEVER, MANUFACTURE ANY EQUIPMENT.

DURING THE DAY, THE VISITORS WILL LEARN MORE ABOUT CPD'S ENTIRE TELECOM PRODUCT LINE. THEY WILL DISCUSS TRANSISTORIZED RF MICROWAVE TERMINALS (TRS-660), TRANSISTORIZED CARRIER SYSTEMS (TCS-600), MICROWAVE RF, HIGH SPEED DATA COMMUNICATIONS TERMINALS (TDS-90,91) AND OTHER CPD EQUIPMENT SPECIFIED AND APPROVED BY THE GOVERNMENT. MOBILE PRODUCTS ALSO WILL BE PRESENTED BY BILL BENNETT, MANAGER-MARKET DEVELOPMENT.

Telecommunication laboratories will be toured in the latter part of the afternoon.

GE ENGINEER SPEAKS TO LSES (Cont'd)

PROVIDING SOME EQUIPMENT FOR THIS SAN FRANCISCO DISTRICT (RAPID TRANSIT) TEST SYSTEM.

Wallace's talk will be made at the Presidential following a 7:00 p.m. dinner meeting of the Lynchburg Society of Engineering and Science. Paying guests -- especially interested in the presentation -- are invited to attend the program January 19.

Chicken & dumplings.....45¢
Barbecue spare ribs.....40¢
Stuffed cabbage roll.....35¢

THE BETTER TO SERVE -- Campbell County's young (2-year-old) and busy (100 and more calls per month) Rescue Squad got a boost in its ability to serve people last week with the installation of two-way mobile radio in its 32 crew members' cars. -- In the photo above, a crew member is seen receiving an emergency phone call...while a General Electric employee, Joe Carderelli, transmits a call to someone in the area. The General Electric base station controls the 32 mobiles while they are in service. -- The Squad bought all its mobile equipment, including an RC-4 remote control unit (located in the Squad President's basement...allowing 24-hour transmitting capability) from General Electric, through CPD's Factory Modernized Radio (FMR) program. -- A crew member in Lexington communicated crisply and clearly with the Squad over the weekend soon after the equipment had been installed. Lexington's Police Chief was in the car at the time -- amazed at the fine reception through the system. Already, Carderelli says, the units are helping the Squad provide better service to area people. This includes emergency first aid wherever needed; and emergency (only) transportation outside the City of Lynchburg (which is serviced by private service, and by a local Life Saving Crew). -- GE members of the Campbell County organization include Carderelli, Otis Maxey, Wayne Pulliam, Paul Coleman, Dick Porter and Melvin Hunter. The United Fund supported agency is located on Route 29 South, just past the Airport Road.
