HOW GENERAL ELECTRIC IS HELPING UTILITIES TO SQUEEZE MORE OUT OF THE ATOM

This tiny pellet packs the energy to light your home for 3 years.

The pellet is nuclear fuel. It was made by General Electric for atomic power plants... an economical new way to produce electricity.

UTILITIES ARE MAKING ELECTRICITY THAT WAY NOW. GENERAL ELECTRIC HAS ALREADY BUILT EIGHT ATOMIC POWER PLANTS. AND THEY'RE BUILDING OR DESIGNING ANOTHER 25. THE LAST ONE WILL BE FAR MORE EFFICIENT THAN THE FIRST, WILL SQUEEZE FAR MORE OUT OF THE ATOM.

General Electric is working with utilities in other areas...installing computers to improve customer service...developing more efficient distribution systems...and designing extra-high-voltage systems to transmit power over long distances at lower cost.

IN MANY WAYS, GENERAL ELECTRIC IS MAKING PROGRESS IN HELPING UTILITIES MEET THE SOARING DEMAND FOR ELECTRICITY. BUT, AT THE SAME TIME, HELPING THEM TO KEEP YOUR BILL FROM SOARING.

Progress is our most important product.

(THE ABOVE IS ADAPTED FROM THE CURRENT SERIES OF GE INSTITUTIONAL ADS BEING RUN IN TIME, NEWSWEEK, U.S. NEWS AND WORLD REPORT, BUSINESS WEEK, FORBES, FORTUNE, HARPER'S, ATLANTIC, THE REPORTER, SATURDAY REVIEW & THE NEW YORKER.)
