General Electric
MASTR[®] PE Personal Radios
Quality that speaks for itself

Field-proved performance
that will pay off

Ever since their introduction, the MASTR PE Personals have been the radios people have turned to for high-spec performance and dependability. Under some of the toughest field conditions imaginable, they've proved more than equal to the challenge.

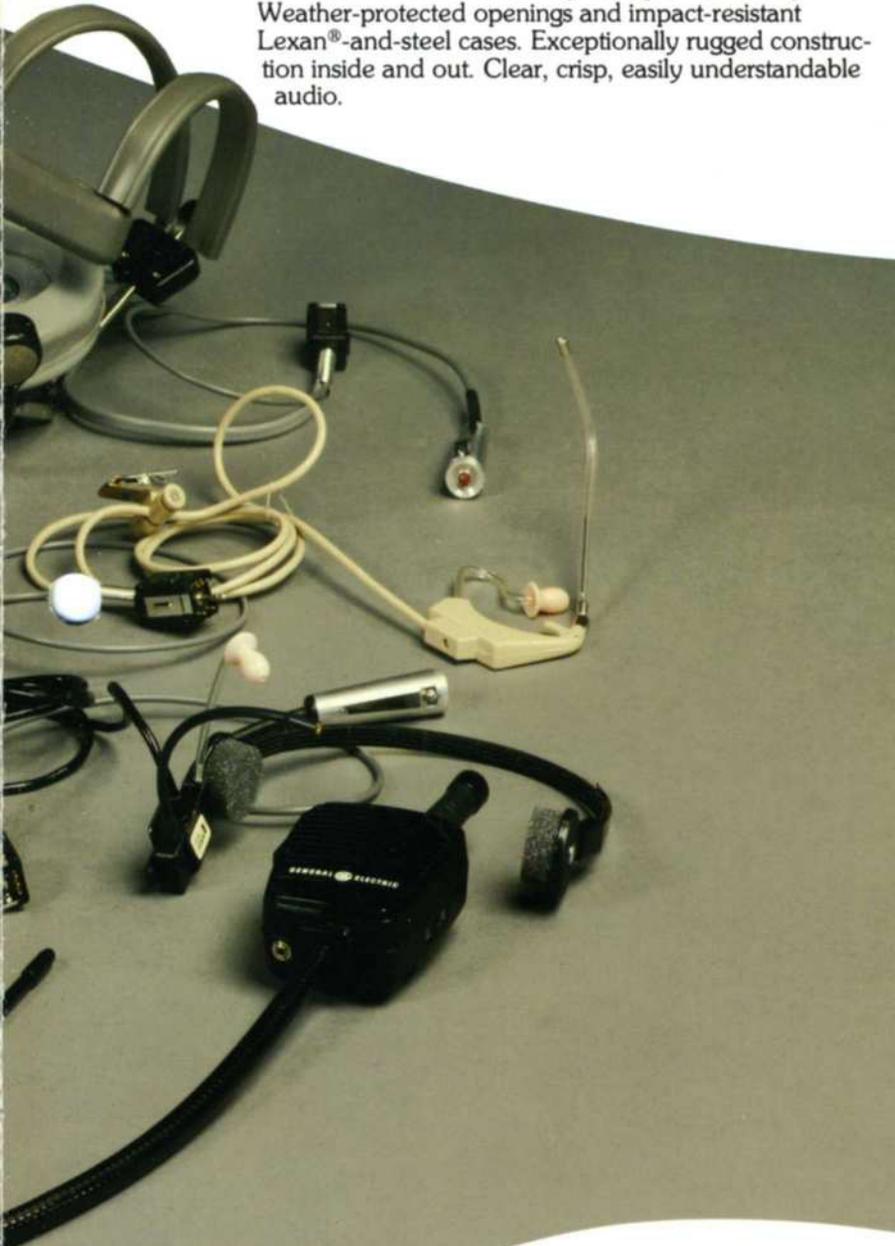

That's hardly surprising. Because GE's High-Power and Medium-Power PE Personals are loaded with the top-quality features and functions needed to satisfy the broadest range of system requirements. RF outputs up to 5 watts and a high-performance, single-conversion receiver, for example. A standard 700 mAh rechargeable battery with a much-imitated twist-lock connector that makes battery changeovers a snap. Weather-protected openings and impact-resistant Lexan®-and-steel cases. Exceptionally rugged construction inside and out. Clear, crisp, easily understandable audio.

For applications in hazardous atmospheres, several PE models have also been approved as Intrinsically Safe for Class I, Division I, Group D operation.

Options? A beautiful selection. Like up to 8-channel capability. Like desk and multi-unit chargers, plus a vehicular charger that allows your personal to perform like a mobile radio. Like Search Lock Monitoring, dual front end, Channel Guard tone-coded squelch system and selective calling. Plus a wide selection of antennas, batteries, carrying and audio accessories.

The MASTR PE Personals. You have to see for yourself what a remarkable difference they can make in your operation.

Note: Some models are shown with optional equipment

Performance Characteristics

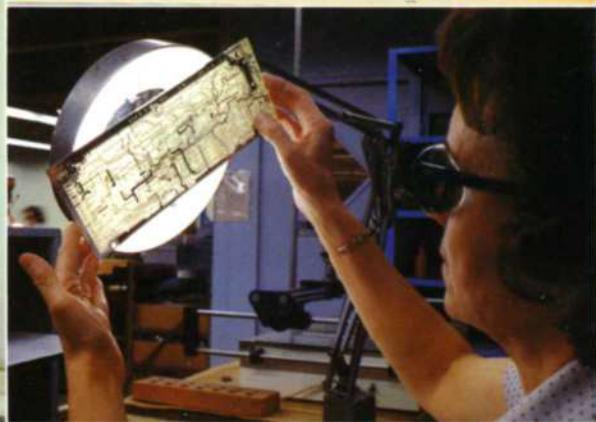

Output Powers—Up to 5w

Frequency Bands—LB, MB, VHF, UHF

Number of Channels—Up to 6

Models/Options—Wide selection of options; two case sizes

Quality begins with people

People like our product design, inspection, test and manufacturing personnel, who help maintain the industry's most stringent quality-control standards.

People like our sales and service representatives. Permanent residents of the area they serve, they're uniquely prepared to provide responsive, professional, on-the-spot service and support. When you need it.

People, in short, who will stay with you and work for you. That's what makes the General Electric team part of your team.
